The Foreign Exchange & Options markets carry a high level of risk that may not be suitable for everyone. Leveraged trading in particular creates additional risk and potential loss exposure. Before you decide to trade or engage, educate yourself and carefully consider your objectives, experience level, and risk tolerance. You could lose some or all of your capital; do not place funds that you cannot afford to lose. Risk capital is money that can be lost without jeopardizing one's financial security or lifestyle.

There are many independent risk factors such as trader ability, brokerage execution, internet connections and more that can have a significant impact on overall results.
