Hey (Prospect's Name), (Your Name) here.

How are you doing?

Did I catch you at a bad time or do you have a couple minutes to talk?

(If they don't have time, tell them you will call them back)

If they have time.

(Prospect's Name), the reason I'm calling is, a good buddy of mine out of Florida... who is really sharp is building out a new wireless network for the IoT (Internet of Things) and 5G.

Are you familiar with any of that stuff?

(It doesn't matter what your prospect says) You say...

Well, I knew a little bit about it but what caught my attention was... instead of building out the infrastructure for the IoT and 5G with big companies and big towers that transmit radio waves that are not biologically safe... they're building out a biologically safe, decentralized network utilizing existing homeowners and small businesses to create the mesh. Their goal is to deploy 35 million hubs throughout the world by 2025 and they're just getting this deployment started. In fact, they only have a little over 100 thousand hubs deployed right now.

These guys are totally funded, and they don't need any money. What they're looking for are locations where they can deploy their hubs.

And Rick told me that if my location qualified to get a free hub, they'd ship a hub to me at no cost... and... since these hubs also mine crypto currency, these guys are willing to give a percentage of the crypto that each of these hubs mine to the location where the hub is deployed.

Rick did a miner assessment for my location to see if it qualified for a free hub miner... And it did. They sent me a hub miner at no cost... that I put on a window cell of one of our spare bedroom's upstairs and it made me over \$125 in my first month.

And as far as I can see, I'm going to be making that every month.

And here is something else that they did, that I thought was pretty cool.

Do you remember when Direct TV rolled out their friends and family deal? Where they gave you a free month for every friend that you referred to Direct TV.

These guys are doing the same thing, but since they're already giving us the hub for free, what their doing is... giving us a percentage of the crypto that is mined by any of the hub miners that get deployed to an address that we refer.

If you're open to it, I'd like to do a miner assessment on your property to see if your property qualifies. And if it does, and if you start making \$125 per month from your hub miner like I am from mine, they're going to reward me with \$100 referral commissions. You don't have a problem with that; do you?

It's like a WIN/WIN. If make \$125 from your Free hub miner, they'll pay me \$100.

And if you want to refer some people too, you can. There is no limit to how many people you can refer. I mean, their goal is to deploy 35 million Hub miners over the next 4 years. My goal is to refer 15 to 20 locations. I figure that could make me over \$2,000 per month.

So, if you're open to it, I'd like to do an assessment on your location to see if you qualify for a Free Hub miner; sound fair?

But just so you know, it's first come first served. If someone else in your area does a mining assessment that qualifies before you, then they get the hub miner; not you.

So, you will need to act quick.

I'm going to text you a link to a page where you can enter your address so we can start the assessment. There is also short 2-minute video on that page that explains what they're doing too.

What is the best number to text you?

(If they are not positive) Tell them...

No problem, I just thought I'd check with you before I call someone else for your area.

(If they start to ask questions) Tell them...

I'll text you a link to a 2-minute video that you can check out and if you like what you see, you can fill out the form for the mining assessment, and if it doesn't do anything for you, you can just ignore it. Fair enough?

(If they say "YES" they'd like to see if their location qualifies) say...

Give me about 2-minutes and I will text you the link. And as soon as I get your site survey results, I will let you know.

**THE ANSWER TO
EVERY QUESTION IS...**
